Nature Refined.

Ridgeline

Product specifications

With Ridgeline, we bring wood surfaces into the third dimension. Inspired by the mountain ridges of the Bavarian Alps, this flexible panel offers unprecedented depth, texture and dynamic visual effects.

Ridgeline is designed for panelling wall surfaces and furniture fronts and can be installed both magnetically and conventionally. The ultra-thin iron foil on the back enables magnetic installation, allowing the panels to be arranged effortlessly. The design of the ridged surface structure allows the left and right sides of the panel to be different; one side starts with a „valley“ and the other side ends with a „ridge“, allowing many different configurations to be realised by turning the panels 90° degrees and 180°.

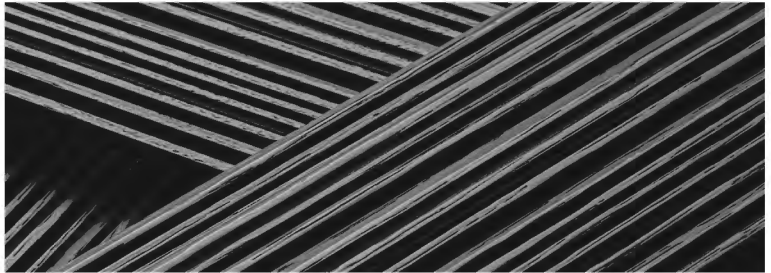

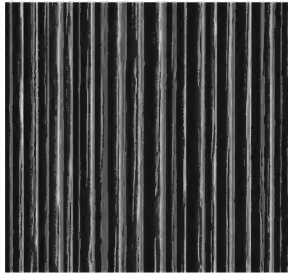

The interplay of structure, colour and light creates a natural and timeless aesthetic in both traditional and modern buildings. The magnetic attachment also enables damage-free removal and makes Ridgeline a recyclable panel for flexible reuse.

Area of application	Panelling wall surfaces and furniture fronts.
Description	Oak panel with ridged surface and iron foil on the back, suitable for installation on magnetic backgrounds.
Length	approx. 600 mm
Width	approx. 120 mm
Thickness	5.0 mm (+/- 0.5 mm)
Structure	Oak top layer, iron foil backing
Packaging unit	14 pieces, approx. 1 m ² , packed horizontally in a box. Weight 3.47 kg
Surface	Diffusion-open Schotten & Hansen surface Surface treatment with natural oils, resins and waxes. Avoid highly acidic and alkaline agents.
Installation	Designed for panelling walls and furniture fronts, using magnetic adhesion or conventional mounting, for example by screwing or gluing. For magnetic mounting, the background must be fitted with a magnetic surface. Schotten & Hansen offers complementary magnetic plates for this purpose.
Accessories	Magnetic mounting plate approx. 785 mm x 600 mm x 4.8 mm consisting of a wood fibre board with tongue and groove profile and magnetic foil backing. Touch-up materials for colour retouching of cut edges and mechanical damages.
Cleaning & care	Only Wood Wellness products are recommended for cleaning and care. For further information, please refer to the cleaning and care instructions or contact our service department at: service@schotten-hansen.com
Circularity	Thanks to the magnetic mounting option, Ridgeline can be dismantled without damage and is therefore fully reusable.

Ridgeline

Colour

Bog oak

Selection

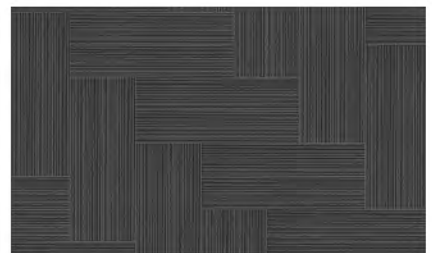

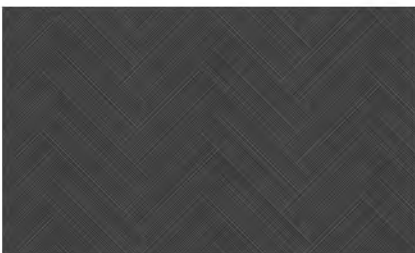

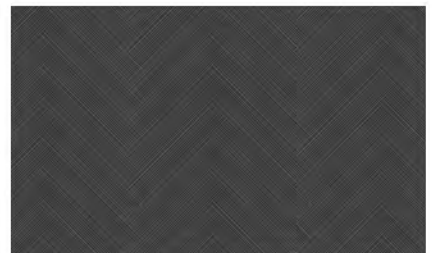

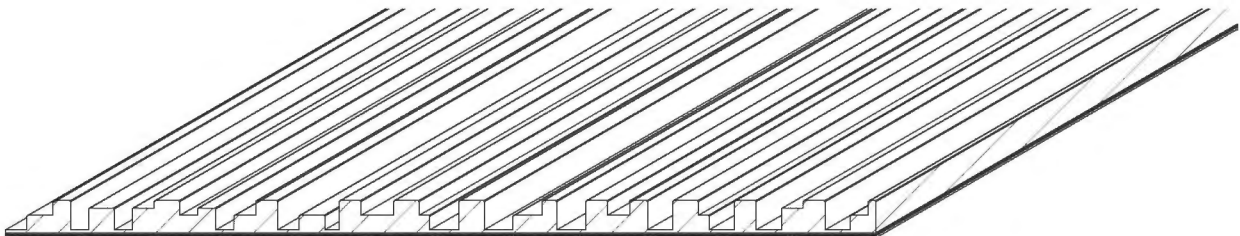

Fine

The grading is basically knot-free.

Processing

Ridged and brushed

Lengthwise ridged in varying depths, as well as noticeably brushed wood surface.

It is possible to create a variety of different patterns with a single panel.
