# Wood Soap

## Cleaning

Our Wood Soap is a concentrate for cleaning wooden surface. The special formula was developed by Schotten & Hansen to be perfect for oiled hardwood interiors. As well as gently cleansing dirt and impurities, natural oils restore the resilience of the wood.

Description	Art. Nr. EU + UK	Art. Nr. USA	Quantity
Wood Soap (small)	30640	30643	200 ml (7 fl. oz.)
Wood Soap (medium)	29638	30639	1 l (34 fl. oz.)
Wood Soap (large)	30644	30647	5 l (1.3 gal.)

## How to apply to wooden surfaces

First, shake the Wood Soap well and add 30 ml (1 fl. oz.) of the concentrate to 2 l (70 fl. oz.) of hot water. As soon as the wiping water is dirty, it should be replaced. Use a cotton mop or cotton cloth (not microfibre) to wipe the surface with the solution until uniformly damp. Due to the open-pored nature of Schotten & Hansen wooden surfaces, please make sure to wipe wet. We recommend wiping it a second time with a damp cloth to absorb the remaining dirty water. If more gloss is required, the surface can be dry-polished with a polishing machine, a cotton cloth, or a white polishing pad.

Before using the Wood Soap on wooden surfaces from other manufacturers, we recommend testing on an invisible area first.

For highly-frequented areas, e.g. a hotel lobby or a sales area, we recommend doubling the concentration of the Wood Soap and cleaning with a polishing machine (white pad, sisal brush). Allow 2 hours drying time between cleaning and polishing.

For the best results, use Wood Soap at least once a month. Repeat three times a month for heavy dirt levels and up to once per day for high footfall commercial areas.

By following these steps, you enhance the resistance of your floor to dirt and moisture over time. With regular and correct use, Wood Soap retains the original beauty of wooden surfaces.

1.  shake well before using
  2.  30 ml (1 fl. oz.) Wood Soap/  
2 l (70 fl. oz.) hot water
  3.  wipe until uniformly damp
  4.  absorb dirty water
  5.  let dry 2 h
- optional  polishing

# Wood Soap

## Yield

1 l (34 fl. oz.) of Wood Soap cleans approx. 1600 m<sup>2</sup> (17000 sq. ft.). This figure may vary depending on the condition and absorbency of the wooden surface.

## Further information for Schotten & Hansen wooden surfaces

We advise against mixing Schotten & Hansen products with other brands. For the best results, use only Schotten & Hansen cleaning and care products. You can purchase cleaning accessories such as mops and buckets from our webshop.

- Aggressive, alkaline or solvent-based cleaning products can damage polish on wooden surfaces.
- Remove dirt from the floor or furniture surfaces as soon as possible to prevent staining.
- Avoid cleaning with microfibres or abrasive sponges
- Remove standing water and puddles as quickly as possible and protect your wooden surfaces from constant moisture.

## Frequently asked questions:

(Applicable to Schotten & Hansen wooden surfaces)

Q: At the start of the questions and answers, respectively.

A: We recommend wiping the persistent stains more often and letting the water soak in a little longer before wiping again to absorb the dirty water. Never use partial abrasive cleaners or scouring pads, as this can damage the surface of the floor and remove colour pigments that have been elaborately worked into the surface. This can cause areas of light staining.

Q: What to do if stains cannot be removed after maintenance cleaning with Wood Soap?

A: In such cases, we advise you to contact our service department for further advice.
