

The Milano Table

INTERIOR

The Milano Table

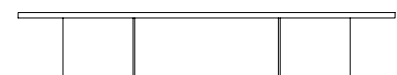

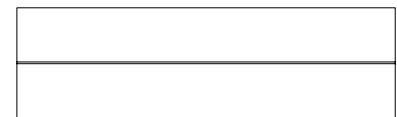

The Milano Table creates a dramatic and imposing feature in any dining or meeting room. The heavy character of the wood along with the light and airy character of the glass form a graceful balance, creating the illusion of a floating table top.

The wooden table top features our dramatic and exclusive Shrunken surface and the glass base is visually attached to the top by a hammered stainless steel band that runs the whole length of the table and down to the floor. The Milano Table range has been designed exclusively for Schotten & Hansen by Francisco Cortina.

Details

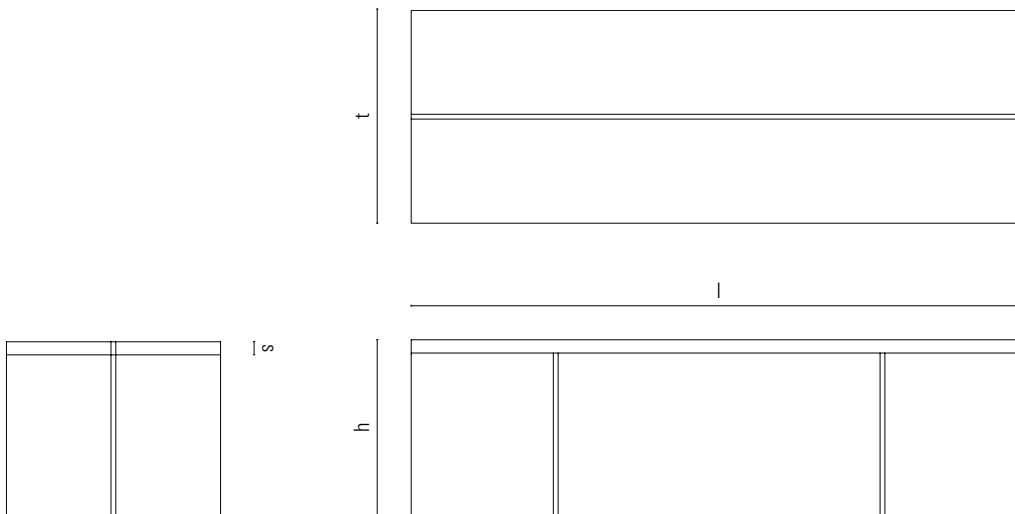

- The Milano Table is offered in three sizes to seat four, eight or twelve people.
- Available in four exclusive Schotten & Hansen colours – Antique Ivory, Oyster, Smoke and Sepia.
- While the top has the appearance of a single, massive piece of timber, it benefits from the stability of our multi-layered construction techniques.
- The hammered stainless steel frame structures the table and links with the glass legs.
- The legs are of high-quality glass giving a completely transparent yet strong support for the top.
