

Wood Soap

Cleaning concentrate for regular cleaning

UFI: Y8UQ-52JD-200A-6U0N

Description

Wood Soap is a cleaning concentrate for the regular cleaning of oiled wooden surfaces indoors. As well as cleaning, the natural oils it contains make the cleaned surfaces more resistant to dirt and moisture. Used regularly and correctly, Wood Soap preserves the original beauty of wooden surfaces, creating an aesthetic patina over time.

Preparation

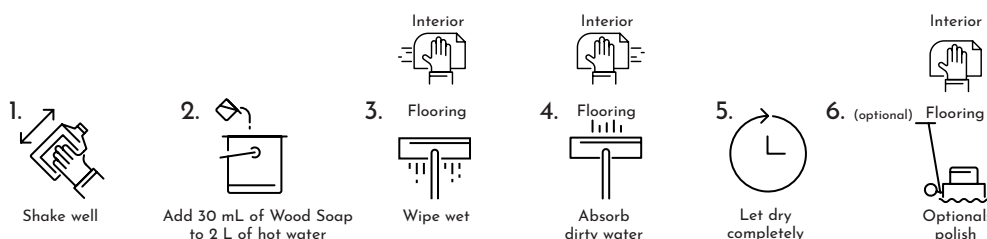

Before wet cleaning, remove loose dirt with a vacuum cleaner or broom. Remove carpets and any other easily movable objects.

Application

Shake the product well. Add 30 mL of Wood Soap to 2 L of hot water. Wipe the wooden surface evenly with a cotton mop or cotton cloth (no microfiber!). Then wipe a second time with a damp cloth to remove the loosened dirt. Leave to dry completely. For an extra shine, polish the surface after drying using a polishing machine with a beige pad or sisal brush or by hand using a cotton cloth or a beige polishing pad.

In residential areas, use the product monthly or at most three times a month if the surface is heavily soiled. In high-traffic areas (e.g. hotel lobbies or retail spaces), the product can be used once a day.

For high-traffic areas, it is also recommended to use a stronger cleaning solution (up to 60 mL of Wood Soap to 2 L of hot water) and polish with a polishing machine (beige pad or sisal brush) after cleaning and complete drying.

Important Notes

For wooden surfaces from other manufacturers, test the effect of the product on an invisible area before first use. This product is only of limited suitability for cleaning raw wooden surfaces, as the oils it contains may cause discoloration. The product is not suitable for lacquered surfaces. A data sheet for medical personnel is available upon request.

Coverage

Ca. 1600 m²/L at normal cleaning concentration. Actual coverage may vary depending on the condition and absorbency of the wood surface.

Storage

Store in a cool and dry place.

Disposal

Dispose of in accordance with official regulations. Non-contaminated and completely emptied packaging can be recycled.

Shelf Life

2 years from date of packaging

Ingredients

Water, natural oils, hydrocarbons, surfactants, thickeners, preservatives, heavy metal-free drying agents

pH-Value

5 - 6

Density

Ca. 0.98 kg/L

Art.-No. / Packaging

29638 1-L-Bottle
30644 5-L-Canister

In addition, item 31543 "Maintenance Kit" includes a 200 mL bottle of Wood Soap.

Made in

Germany
