Striking annual rings

Ash wood floor

Medium Graincut Empire by Schotten & Hansen © Schotten & Hansen

Schotten & Hansen presents a new floor collection made of ash wood with Graincut Empire. The special feature of the collection lies in the processing of the wood: it is sawn transversely to the trunk axis, which makes the characteristic annual rings visible and the surface is given a unique texture. Through the complete use of the tree trunk, the manufacturer relies on resource-saving material processing and underlines its sustainable claim.

Function and areas of application

While brainwood was traditionally mainly used in workshops, for example because of its sound-insulating and elastic properties. With Graincut Empire, these qualities are now transferred to residential and commercial areas. The square and rectangular blocks in three color variants can be arranged flexibly and open up new scope for planners.

Dark Graincut Empire © Schotten & Hansen

The multi-layer construction, combined with tongue and groove constructions, ensures a stable and durable connection of the elements. The surface treatment emphasizes the natural grain and the characteristic annual rings of the wood, without compromising the functionality or material quality. NG

Manufacturer: Schotten & Hansen
Product: Graincut Empire

Product category: Interior fittings
