

New cleaning and care product

Wood is a natural product that people like to surround themselves with. In order for an aesthetic and homogeneous patina to form on the surface over the years, regular cleaning and care is essential. We have learned from observing the forest how each tree protects itself and imitate these processes by allowing resins, waxes and oils to penetrate deep into the wood with our care products. The wood can thus continue to age aesthetically in its installed state and its pleasant soft and room-warm surface structure is permanently preserved.

Wood Soap

For exhausted wood surfaces

Wood Soap is a concentrate for regular maintenance cleaning. In addition to the cleaning effect, the special composition of natural oils supports the original resistance of the wood surface. The application is particularly suitable for heavily used surfaces.

Wood Soap Wax NEW

For more gloss after polishing

With Wood Soap Wax, we have succeeded in developing a natural cleaning agent that not only cleans, protects and revitalises the wood, but also creates a charming shine on floors and interior elements thanks to the high wax content.

Both care products are available in 300 ml, 1 L and 5 L. The sustainable 1 litre stand-up floor bag facilitates dosage and reduces packaging waste.

Both care products are available in three different packaging sizes.

Beeswax, candelilla wax, carnauba wax and shellac wax, among others, provide a higher gloss level in Wood Soap Wax.

Wood Soap Wax can be used diluted on all treated and untreated, unpainted wood surfaces.
